

Assignment 2 - Storefront in HTML

Team Name: The Golden Snubs

Team Members: Hansaint Noto, Carlos Posadas, Abdurrehman Aslam, Ghazi Harara

Description:

- We were subjected to making our storefront in HTML (4 or 5) only currently, But no CSS or Javascript (yet) since this is phase 1 of our storefront.
- Submit all files in the starter repository along with this group write-up to Github and then present the first phase of our storefront on 3/14 in class.

Approach/ what we did:

- The way we approached this was first by separating who was going to work on which sections of the storefront and splitting the work of the sites.
- Aslam: Payment page, checkout page, and Cart page
- Hansaint: Home Page, Menswear Page, Womenswear Page
- Carlos: Ads/Campaign page, Search Page, System/preferences Page
- Ghazi: FAQ Page, About Page
- Everyone: Polish the site

Issues and Resolutions:

- Everyone put your issues and resolutions here in each dashed point with your name describing the problems you had while working on the pages and how you resolved them.
- Hansaint: The first problem I had when making the website was figuring out how tabling works and how it can work in our favor when it came to making the website.
- Carlos: The first problem I had while working on my pages was first the whole rule of not including CSS because I had trouble not wanting the format that I wanted with just HTML. After, then I had problems with deciding how to format the campaign page since I wanted to have a text layout on top of the images but that's not possible yet without CSS. So I just used a table to put the images side by side for the next phase to add the text on top with padding too.
- Abdurrehman: My main problem was making the site without using CSS. I was not able to fully take CSS out of my code, but I was able to minimize enough that my group mates would be able to remove it without spending too much time.
- Ghazi: A lot of the issues I had, had to do with the formatting of my text which was difficult to do without the usage of CSS, however there was an HTML Reference List that gave me the tags I would be able to use to make text italic, center, smaller, etc. In particular an issue that I had with both the FAQ and the About page was that when I inputted text it would automatically be underlined which was not something that I wanted because it would end up looking very messy, however I was able to fix that by removing the `<p>` tag before adding my block of text. A particular issue that I had was wanting to place the FAQ questions and answers in their own individual boxes, I was able to solve this by using `<dialogue>` to place the text in its own dialogue boxes.

About Us

"The Golden Snubs, or TGS for short, was founded in 2023 by a group of friends who shared a passion for fashion and a desire to create a brand that was truly unique. The founders, Hansaint Noto, Carlos Posadas, Abdurrehman Aslam, and Ghazi Harara, came together with a vision of creating a clothing line that would stand out from the crowd."

-Ghazi Harara when questioned about the future goals for TGS

"At TGS, we understand that fashion is not just about looking good, it's also about feeling good. That's why we take great care in selecting the materials we use for our clothing. We believe that quality and comfort should never be sacrificed for style. Our commitment to using only the best materials ensures that our customers not only look good but also feel good in our clothing. We are dedicated to providing a shopping experience that is both enjoyable and satisfying, and we are always striving to exceed our customers' expectations. At TGS, we are more than just a fashion brand, we are a lifestyle."

"TGS, give us your money now."
